Collibra

Who we are

AI is only as powerful as the data behind it. At **Collibra**, we build the data intelligence that makes AI reliable, responsible, and ready for the real world. Our platform helps organizations trust their data, move faster, and turn complexity into clarity, so innovation doesn't come at the cost of confidence.
Join us to build the infrastructure that makes reliable AI possible

Why Intern with Collibra?

- **Mentorship from top engineers:** Pair program with senior engineers and participate in code reviews with industry veterans who've built systems at scale
- **Real impact:** No "busy work." Our interns participate in projects that go into production and affect Fortune 500 customers.
- **Global collaboration:** Work across time zones with colleagues in Europe and the US
- **Professional development:** Attend engineering demos and knowledge-sharing sessions featuring leaders from across the organization, customers, and entrepreneurs
- **Technical depth:** Professional experience building high-quality applications across our technology stack, including backend services, frontend interfaces, and cloud infrastructure

Choose your track

Software Engineering	AI & Data Science	DevOps & Platform
Build high-performance APIs and intuitive user interfaces.	Develop ML models for automated data classification and discovery.	Scale global infrastructure using "Infrastructure as Code."
Focus: Java, Spring Boot, React, TypeScript	*Focus: Python, PyTorch, NLP, Metadata*	*Focus: AWS, Docker, K8s, Terraform*

The Intern "Extra Mile"

- **Mentorship:** 1-on-1 guidance from senior engineers.
- **Innovation days:** Participate in internal learning and growth initiatives covering a broad range of topics.
- **Career pathing:** Many of our interns return as full-time Collibrians.
- **Internship Program:** 3-month program that will run from August to October, with the option to extend for an additional 3 months.

To apply
University students who have completed their Bachelor's degree and are interested in summer internships with Collibra at the Brussels office can send their resumes directly to brandon.barrett@collibra.com. The application deadline is flexible to accommodate students still completing their studies.
